## Closed Trades

The strategy rebalances **monthly** – signals are computed daily, but positions only change at month-end (last trading day decision, execution next morning). The closed-trade ledger below is derived from the *engine's actual book*: each row is a position that the book opened and later closed, with hold duration measured from when the name first appeared in the weights to when it dropped out.

Closed positions: **355**. Mean hold: **43 days**. Median hold: **30 days**. Mean gross return: **2.1%** (absolute price over the held window).

Win rate: **61%**.
